Summary

Full Stack Java Developer with around 5 years of experience building scalable web applications using Java, Spring Boot, Microservices, and front-end frameworks like React/Angular. Skilled in developing REST APIs, optimizing databases, and implementing CI/CD pipelines with Git, Jenkins, Docker, and Kubernetes. Strong background in cloud platforms (AWS, Azure) and test automation using JUnit, Mockito, and Selenium. Adept at collaborating in Agile environments to deliver secure, high-performance, and user-centric software solutions.

Experience

State Street, USA | Full Stack Java Developer — June 2024 - Current

- Designed, developed, and maintained scalable full-stack web applications using Java, Spring Boot, and React, delivering high-performance features for enterprise financial systems.
- Architected and implemented RESTful APIs and backend microservices to support secure data exchange, system integrations, and workflow automation across global business units.
- Collaborated with Product, QA, UX/UI, and DevOps teams in an Agile environment to refine technical requirements, plan sprints, and deliver high-quality software aligned with State Street's operational needs.
- Built modern, responsive UI components using React and ES6+, ensuring excellent usability, accessibility (WCAG-compliant), and compatibility across browsers and devices.
- Created robust unit and integration tests using JUnit, Mockito, and frontend testing tools, improving code reliability and reducing production defects across mission-critical applications.
- Improved application and database performance by optimizing SQL queries, refining ORM models, and implementing caching strategies to support low-latency financial data flows.
- Contributed to CI/CD pipeline enhancements using Jenkins, automating build, test, and deployment workflows to streamline release cycles.
- Diagnosed and resolved complex technical issues across development, QA, and production environments, enhancing system stability and application uptime.
- Participated in architectural discussions, prepared technical documentation, and mentored junior developers, promoting best practices and continuous process improvement.

Freshworks Inc, India | Java Developer — Jan 2020 - Dec 2022

- Designed and developed robust backend solutions using Core Java and Spring Framework, ensuring scalable and efficient application performance aligned with product requirements.
- Built and consumed RESTful APIs for seamless integration between microservices and frontend components, improving modularity and reusability.
- Collaborated with cross-functional Agile teams including QA, product, and DevOps to refine user stories, conduct sprint planning, and deliver features on time.
- Implemented persistence layers and data access logic using JPA with relational databases (e.g., MySQL/PostgreSQL), optimizing CRUD operations and query performance.
- Developed dynamic, responsive user interfaces using Angular (components, services, routing, and reactive forms) and integrated them with Java Spring Boot REST APIs, ensuring seamless front-end and back-end communication.
- Participated in code reviews and technical design discussions, enforcing coding standards and best practices to improve application maintainability and team output.
- Troubleshot and resolved complex production issues, analyzing logs, debugging code, and applying fixes that enhanced system stability and user experience.
- Adopted modern software development practices including version control (Git), CI/CD workflows, and incremental deployments to support frequent and reliable releases.

Skills

Programming Languages: Java 8/11/17, JavaScript, PL/SQL, Python, C++
Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Spring Webflux, Node.js, React.js, Angular
J2EE Technologies: Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, Generics, Concurrency, Collections
Web Technologies: HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap
DevOps/ Cloud Platforms: Docker, Kubernetes, Jenkins, Bamboo, Ansible, AWS, Azure, Google Cloud Platform (GCP)
Databases: Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB
Version Control & Other Tools/ IDEs: Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant, IntelliJ IDEA, Eclipse, Visual Studio Code
Testing and Logging Tools: Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J
Soft Skills: Effective verbal and written communication, Problem-solving, and Troubleshooting skills

Education & Certification

Master's in Computer Science, George Mason University, Fairfax, Virginia
Bachelor's in Computer Science, Anna University, Chennai, Tamil Nadu
AWS Certified Solutions Architect - SAA 003.
